

small and home-based business solutions

Stickman Technology can help small and home-based businesses establish and maintain their computer systems. We can offer:

- provision of domain names and web hosting space with individually tailored features, and specific advice to help your business establish a web presence.
- e-mail addresses: as many as you need for all your different employees or projects. All coming with easy setup and configuration, and ready virus checked before arriving at your desk!
- web page statistics and advice on promotion: track how effective your web-based marketing is.
- software and hardware support for individual PCs or small networks. We offer personal one-to-one support in order to understand your staff needs and abilities and will always respond appropriately.
- advice and consultancy for setting up networks, internet connectivity, office moves and other IT-based projects you may be planning.
- a full range of anti-virus and security solutions, which remain practical and cost-effective.
- provision of properly supported broadband internet connections to match your needs.

Stickman Technology supports many small and home-based businesses in the Southampton area including Alderwood Consulting and Pattersong Music.

A selection of artwork and websites we have designed and supported

“ Being able to discuss my individual requirements with experienced and competent staff is a rare and much appreciated service. The responsiveness from Stickman Technology to various requests has been especially valuable. ”

*Martin Paterson
Pattersong Music*

“ A one-stop shop for all my IT needs, with impressive listening skills that translate my problems into effective and realistic technical solutions. The professional responses get me straight back to productive work, with the confidence that I will get the same high quality guidance for my hardware and software needs as my business grows. ”

*Jonathan Fulcher
Alderwood Consulting*
